Subject Index

- acetophenone hydrogenation
Selective hydrogenation of acetophenone on chromium promoted Raney nickel catalysts. II. Catalytic properties in the hydrogenation of acetophenone, determination of the reactivity ratios as selectivity criteria 147
- adiponitrile
Surface characterization and catalytic properties of several graphite supported potassium-free and potassium-doped nickel catalysts 115
- AlPO_4
Anion treatment (F^- or SO_4^{2-}) of AlPO_4 - Al_2O_3 (25 wt.-% Al_2O_3) catalysts. IV. Catalytic performance in the alkylation of phenol with methanol 161
- aminohexanenitrile
Surface characterization and catalytic properties of several graphite supported potassium-free and potassium-doped nickel catalysts 115
- anion treatment
Anion treatment (F^- or SO_4^{2-}) of AlPO_4 - Al_2O_3 (25 wt.-% Al_2O_3) catalysts. IV. Catalytic performance in the alkylation of phenol with methanol 161
- 1,4-benzoquinone
Hydroxylation of phenol with hydrogen peroxide on EUOTS-1 catalyst 71
- catalyst characterization (Auger spectroscopy
Selective hydrogenation of acetophenone on chromium promoted Raney nickel catalysts. I. Characterization of the catalysts 131
- catalyst characterization (FT-IR
Mo-USY zeolites for hydrodesulphurization. I. Structure and distribution of molybdenum oxide phase 37
- catalyst characterization (NO and pyridine adsorption
Mo-USY zeolites for hydrodesulphurization. II. Surface properties of sulphided catalysts and activity for thiophene hydrodesulphurization 55
- catalyst characterization (TPR
Surface characterization and catalytic properties of several graphite supported potassium-free and potassium-doped nickel catalysts 115
- catalyst preparation (alkali leaching
Selective hydrogenation of acetophenone on chromium promoted Raney nickel catalysts. I. Characterization of the catalysts 131
- catechol
Hydroxylation of phenol with hydrogen peroxide on EUOTS-1 catalyst 71
- chromium
Selective hydrogenation of acetophenone on chromium promoted Raney nickel catalysts. I. Characterization of the catalysts 131
- chromium promotion
Selective hydrogenation of acetophenone on chromium promoted Raney nickel catalysts. II. Catalytic properties in the hydrogenation of acetophenone, determination of the reactivity ratios as selectivity criteria 147
- ^{13}C NMR
Electron transfer in zeolites: Formation of aminium and bipyridinium cation radicals 9
- cobalt boride
Effect of promoter on selective hydrogenation of α,β -unsaturated aldehydes over cobalt borides 85
- cobalt-molybdenum oxide catalyst
Water-gas shift reaction on a cobalt-molybdenum oxide catalyst 195
- coke
Adsorption, acid and catalytic changes induced in ZSM-5 by coking with different hydrocarbons 97
- copper
Higher alcohol synthesis on modified iron based catalysts: Copper and molybdenum addition 175
- cresols
Anion treatment (F^- or SO_4^{2-}) of AlPO_4 - Al_2O_3 (25 wt.-% Al_2O_3) catalysts. IV. Catalytic performance in the alkylation of phenol with methanol 161
- deactivation
Adsorption, acid and catalytic changes in-

- duced in ZSM-5 by coking with different hydrocarbons 97
- electron paramagnetic resonance
Electron transfer in zeolites: Formation of aminium and bipyridinium cation radicals 9
- electron transfer
Electron transfer in zeolites: Formation of aminium and bipyridinium cation radicals 9
- ethanal
Selective photo-oxidation of light alkanes using solid metal oxide semiconductors 21
- EUROTS-1
Hydroxylation of phenol with hydrogen peroxide on EUROTS-1 catalyst 71
- fluoride ion
Anion treatment (F^- or SO_4^{2-}) of $AlPO_4-Al_2O_3$ (25 wt.-% Al_2O_3) catalysts. IV. Catalytic performance in the alkylation of phenol with methanol 161
- higher alcohol synthesis
Higher alcohol synthesis on modified iron based catalysts: Copper and molybdenum addition 175
- high resolution electron microscopy
Metal-support interaction phenomena in rhodium/ceria and rhodium/titania catalysts: Comparative study by high-resolution transmission electron spectroscopy 1
- hydrogen peroxide
Hydroxylation of phenol with hydrogen peroxide on EUROTS-1 catalyst 71
- hydroquinone
Hydroxylation of phenol with hydrogen peroxide on EUROTS-1 catalyst 71
- hydroxylation
Hydroxylation of phenol with hydrogen peroxide on EUROTS-1 catalyst 71
- hydrogenation
Surface characterization and catalytic properties of several graphite supported potassium-free and potassium-doped nickel catalysts 115
- iron
Higher alcohol synthesis on modified iron based catalysts: Copper and molybdenum addition 175
- methanal
Selective photo-oxidation of light alkanes using solid metal oxide semiconductors 21
- methanol
Anion treatment (F^- or SO_4^{2-}) of $AlPO_4-Al_2O_3$ (25 wt.-% Al_2O_3) catalysts. IV. Catalytic performance in the alkylation of phenol with methanol 161
- methylanisoles)
Anion treatment (F^- or SO_4^{2-}) of $AlPO_4-Al_2O_3$ (25 wt.-% Al_2O_3) catalysts. IV. Catalytic performance in the alkylation of phenol with methanol 161
- molybdena-USY zeolites
Mo-USY zeolites for hydrodesulphurization. I. Structure and distribution of molybdenum oxide phase 37
- molybdenum
Higher alcohol synthesis on modified iron based catalysts: Copper and molybdenum addition 175
- MoUHY zeolite catalysts
Mo-USY zeolites for hydrodesulphurization. II. Surface properties of sulphided catalysts and activity for thiophene hydrodesulphurization 55
- nickel
Surface characterization and catalytic properties of several graphite supported potassium-free and potassium-doped nickel catalysts 115
Selective hydrogenation of acetophenone on chromium promoted Raney nickel catalysts. I. Characterization of the catalysts 131
Selective hydrogenation of acetophenone on chromium promoted Raney nickel catalysts. II. Catalytic properties in the hydrogenation of acetophenone, determination of the reactivity ratios as selectivity criteria 147
- nuclear magnetic resonance
Electron transfer in zeolites: Formation of aminium and bipyridinium cation radicals 9
- phenol
Hydroxylation of phenol with hydrogen peroxide on EUROTS-1 catalyst 71
- phenol alkylation selectivity (anisole)
Anion treatment (F^- or SO_4^{2-}) of $AlPO_4-Al_2O_3$ (25 wt.-% Al_2O_3) catalysts. IV. Cat-

- alytic performance in the alkylation of phenol with methanol 161
- photo-oxidation
 Selective photo-oxidation of light alkanes using solid metal oxide semiconductors 21
- promoter
 Effect of promoter on selective hydrogenation of α,β -unsaturated aldehydes over cobalt borides 85
- propanal
 Selective photo-oxidation of light alkanes using solid metal oxide semiconductors 21
- radical cation
 Electron transfer in zeolites: Formation of aminium and bipyridinium cation radicals 9
- Raney nickel
 Selective hydrogenation of acetophenone on chromium promoted Raney nickel catalysts. I. Characterization of the catalysts 131
 Selective hydrogenation of acetophenone on chromium promoted Raney nickel catalysts. II. Catalytic properties in the hydrogenation of acetophenone, determination of the reactivity ratios as selectivity criteria 147
- rhodium/ceria
 Metal-support interaction phenomena in rhodium/ceria and rhodium/titania catalysts: Comparative study by high-resolution transmission electron spectroscopy 1
- rhodium/titania
 Metal-support interaction phenomena in rhodium/ceria and rhodium/titania catalysts: Comparative study by high-resolution transmission electron spectroscopy 1
- selective hydrogenation
 Effect of promoter on selective hydrogenation of α,β -unsaturated aldehydes over cobalt borides 85
- selectivity (1-phenylethanol)
 Selective hydrogenation of acetophenone on chromium promoted Raney nickel catalysts. II. Catalytic properties in the hydrogenation of acetophenone, determination of the reactivity ratios as selectivity criteria 147
- selectivity criteria
 Selective hydrogenation of acetophenone on chromium promoted Raney nickel catalysts. II. Catalytic properties in the hydrogenation of acetophenone, determination of the reactivity ratios as selectivity criteria 147
- semiconductors
 Selective photo-oxidation of light alkanes using solid metal oxide semiconductors 21
- SMSI effect
 Metal-support interaction phenomena in rhodium/ceria and rhodium/titania catalysts: Comparative study by high-resolution transmission electron spectroscopy 1
- soaking)
 Selective hydrogenation of acetophenone on chromium promoted Raney nickel catalysts. I. Characterization of the catalysts 131
- STEM/EDX
 Selective hydrogenation of acetophenone on chromium promoted Raney nickel catalysts. I. Characterization of the catalysts 131
- sulphate ion
 Anion treatment (F^- or SO_4^{2-}) of $AlPO_4-Al_2O_3$ (25 wt.-% Al_2O_3) catalysts. IV. Catalytic performance in the alkylation of phenol with methanol 161
- thiophene hydrodesulphurization
 Mo-USY zeolites for hydrodesulphurization. II. Surface properties of sulphided catalysts and activity for thiophene hydrodesulphurization 55
- titanium silicalite-1
 Hydroxylation of phenol with hydrogen peroxide on EUROTTS-1 catalyst 71
- toluene disproportionation
 Adsorption, acid and catalytic changes induced in ZSM-5 by coking with different hydrocarbons 97
- transient kinetics
 Water-gas shift reaction on a cobalt-molybdenum oxide catalyst 195
- TS-1
 Hydroxylation of phenol with hydrogen peroxide on EUROTTS-1 catalyst 71
- unsaturated aldehyde
 Effect of promoter on selective hydrogen-

ation of α,β -unsaturated aldehydes over cobalt borides 85

water-gas shift reaction

Water-gas shift reaction on a cobalt-molybdenum oxide catalyst 195

XPS

Mo-USY zeolites for hydrodesulphurization. I. Structure and distribution of molybdenum oxide phase 37

Mo-USY zeolites for hydrodesulphurization. II. Surface properties of sulphided catalysts and activity for thiophene hydrodesulphurization 55

Surface characterization and catalytic properties of several graphite supported potassium-free and potassium-doped nickel catalysts 115

XRD)

Mo-USY zeolites for hydrodesulphurization. I. Structure and distribution of molybdenum oxide phase 37

Surface characterization and catalytic properties of several graphite supported potassium-free and potassium-doped nickel catalysts 115

Selective hydrogenation of acetophenone on chromium promoted Raney nickel cat-

alysts. I. Characterization of the catalysts 131

xlenols

Anion treatment (F^- or SO_4^{2-}) of $AlPO_4-Al_2O_3$ (25 wt.-% Al_2O_3) catalysts. IV. Catalytic performance in the alkylation of phenol with methanol 161

zeolites

Electron transfer in zeolites: Formation of aminium and bipyridinium cation radicals 9

Mo-USY zeolites for hydrodesulphurization. II. Surface properties of sulphided catalysts and activity for thiophene hydrodesulphurization 55

Adsorption, acid and catalytic changes induced in ZSM-5 by coking with different hydrocarbons 97

zinc oxide

Selective photo-oxidation of light alkanes using solid metal oxide semiconductors 21

ZSM-5

Adsorption, acid and catalytic changes induced in ZSM-5 by coking with different hydrocarbons 97
